SUMMARY

Backend developer with 2+ years building business systems in Java and Spring Boot, and hands-on experience customizing Odoo ERP with Python. Comfortable taking a system from client requirements to deployment, with a focus on secure design: authentication, role-based access and data isolation between tenants. Moving toward application security.

TECHNICAL SKILLS

Languages: Java, Python, SQL, JavaScript, HTML5, CSS3

Backend: Spring Boot, Spring Security, JWT, Spring Data JPA / Hibernate, REST APIs, Flyway, MapStruct, MVC

Frontend: React, Vite

Databases: MySQL, PostgreSQL, relational schema design, normalization, JDBC

Tools & Practices: Git/GitHub, Docker, Maven, Postman, IntelliJ IDEA, Agile/Scrum, OOP

EXPERIENCE

Technical and Functional Consultant | GiGa Global

May 2026 - Present

Córdoba, Argentina · Python, Odoo, PostgreSQL, QWeb, XML

- Translate client business processes into technical requirements for Odoo ERP implementations.
- Build and extend custom Odoo functionality covering client operational, sales and accounting workflows.
- Diagnose and fix defects and configuration issues to keep client systems stable.
- Coordinate updates, data migrations and releases from staging to production.

Software Developer (Professional Internship) | BIO HUB

Mar 2026 - Jun 2026

Córdoba, Argentina · Java 17, Spring Boot, Spring Security, React, MySQL, Docker

- Designed and built a multi-tenant compliance tracking platform that replaces an Excel-based process: each client and the admin see their compliance status and the next tasks required by provincial regulations.
- Implemented a REST API in Spring Boot with JWT authentication and role-based access, keeping each client's data isolated from others.
- Managed the database with versioned Flyway migrations and containerized the application with Docker.
- Delivered a working demo with a React frontend; production rollout is pending on the client side.

Freelance Software Engineer | El Arca Home

Jan 2024 - Feb 2026

Córdoba, Argentina · Java, Spring Boot, MySQL, REST APIs, JDBC, JavaScript, HTML/CSS

- Built and maintain a multi-branch inventory and sales system in production, with real-time stock synchronization, multiple payment methods, customer accounts and reporting.
- Built the store's e-commerce website on a Spring Boot REST API (catalog, cart, stock control, MySQL backend), live in production.
- Handled the full cycle with the client: requirements, relational database design, development, deployment and user training.

EDUCATION

B.Sc. in Software Engineering - Universidad Siglo 21

2023 - Present

4th year · Intermediate degree completed: Software Analyst

Diploma in Java Programming - Universidad Tecnológica Nacional (UTN)

2022
